

## How do you destroy a brain tumor without destroying the brain that surrounds it?

**YOU COME TO STONY BROOK.** Our surgeons work together in teams to remove brain tumors that used to be considered inoperable. How do they do it? First, they're well-versed in the latest technological breakthroughs and surgical techniques. Then, during surgery, they take advantage of advanced diagnostics to pinpoint the harmful tissue. Combine that with unparalleled skill and dedication, and they can remove the most complex tumors while protecting the vital nerves that surround them. This isn't just medicine. This is Stony Brook Medicine.
