

Leading the Way to a **Stronger Tomorrow**

Stony Brook **Medicine**

Our Many Strengths

As one of the largest and highest quality healthcare platforms in New York — and the premier academic healthcare platform in Suffolk County — we have many strengths.

We offer medical and wellness care to 2.9 million diverse residents on Long Island and beyond.

- More than 1,400 physicians in nearly 150 specialties
- A four-hospital network spanning all of Suffolk County
- A 350-bed skilled nursing facility for veterans
- A cancer center, heart institute, neurosciences institute and trauma center
- 216 community-based ambulatory healthcare locations

We're also home to more than 100 research labs and over 400 active clinical research trials, where our patients can access the latest diagnostic tools and medical treatments before they are widely available.

We're keenly aware of the need for greater equity in access to healthcare and more inclusiveness in the recruitment of professionals serving our diverse population. Moving from awareness to action requires a commitment to the future that we fully embrace in measurable ways that include:

Digital Health

Our expanded healthcare delivery system, which includes an extended telehealth program and remote patient monitoring, is already transforming healthcare access and quality for residents on the East End of Long Island and throughout Suffolk County.

LGBTQ+ Healthcare

In 2022, all Stony Brook Medicine hospitals were named national leaders in LGBTQ+ healthcare equality by the Human Rights Campaign Foundation.

Project HOPE

Our Health Occupations Partnership for Excellence (HOPE) Program brings high school students from districts in traditionally marginalized communities to our campus to offer insight, mentorship and foster an interest in pursuing a career in healthcare.

Black Men in White Coats™

Our medical school recently established the region's first Black Men in White Coats™ chapter — which seeks to increase the number of Black men in the field of medicine by exposure, inspiration and mentoring the young Black men in our underserved communities.

We educate tomorrow's healthcare leaders.

Our health sciences schools and programs continue to rise in the national rankings as we recruit new faculty, invest in the latest technology, build new facilities and forge new relationships.

Many of our schools and programs perform research, education and practice in clinical settings such as our Dental Care Center, the largest on Long Island, as well as non-clinical settings such as schools, libraries and homes.

With clear vision, sound purpose and hard work, Stony Brook Medicine has earned its rightful place as a respected national leader in medicine, wellness, research, public health and health science education. ■

A robust research endeavor is vital to the mission of Stony Brook Medicine.

A storied history of firsts

Stony Brook has long been a pioneer and an innovator on the research front. Many things we now take for granted were game changers when they were first discovered or developed in our labs. For example, the technology for the MRI, PET imaging and virtual colonoscopy. The discovery of the etiologic agent for Lyme disease. And the development of the first FDA-approved antiplatelet and anti-integrin receptor drug. These have had a profoundly lasting and positive impact on global health.

A commitment to the future

Because faculty within our clinical departments also serve as investigators for clinical research studies, Stony Brook Medicine can bring new ideas in treatments and technologies to patients more quickly. Our state-of-the-art Medical and Research Translation (MART) building with its advanced infrastructure and imaging capabilities is a testament to our commitment to the future of healthcare. Our research focuses on today's top health issues, including cancer, healthy aging, infectious diseases, neurosciences and advanced medical imaging.

Many of our researchers have been recognized through the National Institutes of Health (NIH) for multimillion-dollar study awards. Some of the hundreds of research initiatives underway include:

Healthy Aging

Established in 2023, the Center for Healthy Aging's research focuses on development of new drugs, therapies and technologies that will extend both physical and mental well-being of the aging population in Suffolk County and beyond.

Cancer

Identification of metabolic vulnerabilities and specific lipid signatures in colon and breast cancers for sensitization to anticancer treatment, while protecting from chemotherapy-induced, harmful side effects, and for advanced cancer prognosis.

Children's Health

Neurocognitive deficits in survivors of childhood cancer; issues related to school and school re-entry for children with cancer; and development of obesity in children with leukemia.

Heart

Use of temporary mechanical circulatory support for patients with acute myocardial infarction undergoing emergency revascularization and the efficacy of novel sensors and cardiac stimulation devices for the monitoring and treatment of patients with heart failure.

Neurosciences

Identification of novel stroke blood and imaging biomarkers that can be used to identify high-risk patients and develop treatments to limit complications associated with the disease.

Trauma

Computer modeling of injury patterns of trauma victims to better predict treatment options and outcomes.

Women's Health

Treatment of non-anemic iron deficiency (NAID) and the impact on the development of anemia later in pregnancy.

Stony Brook University Hospital

With 624 beds, Stony Brook University Hospital provides advanced, comprehensive and compassionate care, serving the healthcare needs of Long Island residents. It is often where patients turn to for most challenging and complex medical conditions. The hospital is home to many New York State-designated health centers as well as the Stony Brook Children's Hospital, Stony Brook Heart Institute, Stony Brook Cancer Center, Stony Brook Neurosciences Institute and Stony Brook Trauma Center. The site of many discoveries and inventions, Stony Brook University Hospital also plays a major role in leading research and pioneering techniques.

Level 1 Trauma Center
for both adults and children

Stony Brook Children's Hospital

As Suffolk County's only children's hospital, Stony Brook Children's delivers the most advanced pediatric specialty care in the region. Our new facility with 104 beds opened in 2019 and was designed with purpose for every child and every family. We offer a full range of comprehensive medical services for infants, children and young adults. And our doctors, nurses and other experts provide leading-edge diagnoses, treatment and management of childhood conditions, illnesses and injuries.

Valerie Fund Children's Center
provides psychosocial services, in addition to medical care, to patients with cancer and blood disorders

Stony Brook Southampton Hospital (SBSH)

A Level 3 Adult Trauma Center, Stony Brook Southampton Hospital, with 95 staffed beds, is the sole provider of emergency care on the South Fork of Long Island. Designated a primary stroke center, the hospital has a cardiac catheterization laboratory with interventional services and is certified in cardiac rehabilitation. SBSH has specialty centers dedicated to comprehensive cancer care, breast health, endovascular surgery, LGBTQ+ healthcare, HIV services, Parkinson's disease, musculoskeletal health, wound care, renal dialysis, wellness programs, tick-borne disease resources and the Shinnecock Indian Nation satellite health clinic.

Stony Brook Eastern Long Island Hospital (SBELIH)

With 70 beds, Stony Brook Eastern Long Island Hospital is the community's hospital. Our vision is simple: to provide the best outcome for every patient, every time. SBELIH is Suffolk County's longest serving hospital, improving access to advanced medical care for residents of the North Fork and Shelter Island with comprehensive healthcare solutions. Our highly regarded inpatient and outpatient Behavioral Health programs combine high-caliber medicine, psychology and behavioral therapy. These outstanding programs are led by board-certified physicians, nurses, counselors, social workers, creative arts therapists and dietitians that customize each patient's treatment plan. SBELIH is also the largest employer on the North Fork, providing more than 420 jobs in the community.

Community-Based Ambulatory Healthcare Centers

Stony Brook Medicine's network of physicians, dentists and staff is committed to making comprehensive and personalized care accessible to all in Suffolk County and beyond. Facilities range from individual practice locations to multispecialty care sites.

Advanced Specialty Care at Commack, one of Stony Brook's largest multispecialty care sites, is home to 38 specialties — including a clinical research space and the World Trade Center Health and Wellness Program — all under one roof. In spring 2023, Advanced Specialty Care at Lake Grove opened, offering convenient, quality medical care in a modern, open-concept layout occupying more than 170,000-square feet.

Long Island State Veterans Home

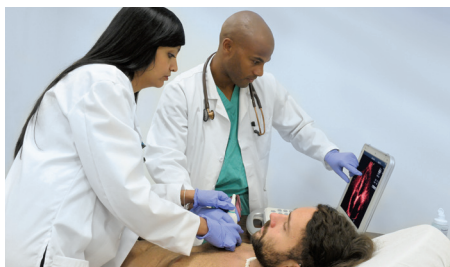

With a 350-bed skilled nursing facility and 40-slot medical model Adult Day Health Care Program, our Veterans Home is dedicated to providing compassionate nursing care to honorably discharged veterans of the United States Armed Forces, their spouses, as well as Gold Star Parents.

Our Veterans Home is one of the few nursing homes in the nation that is fully integrated into the academic mission of a major teaching and research university. The Home serves as a clinical training site for a multitude of geriatric care professionals in the fields of medicine, nursing, rehabilitation and social services.

Stony Brook University School of Social Welfare

The School of Social Welfare prepares students for professional practice with an emphasis on healthcare and social justice. The school offers bachelor's (BSW) and master's (MSW) degrees in Social Work with three curricular areas of specialization including Integrated Health: Physical, Psychological and Social Well Being (IH); Families, Youth and Transition to Adulthood (FYT); and Community, Policy and Political Social Action (CPPSA). Also offered are three dual degree programs (MSW/MPH, MSW/JD and MSW/MA). The BSW and MSW programs are accredited by the Council on Social Work Education, and the MSW program meets New York State Education Department requirements for license examinations.
