

The man on the right is 40% more likely to die from colon cancer.

**AFRICAN AMERICANS ARE AT FAR GREATER RISK. OUR RESEARCH IS OUT TO CHANGE THAT.** At Stony Brook, we're doing cancer research that's never been done before. We're looking at genetics, diet, lifestyle and hundreds of other factors. And we are leading the most concentrated effort yet to collect and study tissue samples. We'll do our part. Please make sure to do yours. Get a colonoscopy. Stay vigilant. And together, we can make an impact.
